Background and Context of Richards Bay Minerals

Overview of Richards Bay Minerals

Richards Bay Minerals is one of South Africa's largest mineral sands producers, specializing in the extraction of titanium dioxide (rutile and ilmenite) and zircon. Located in KwaZulu-Natal, RBM

operates a complex mineral sands mining and processing facility that contributes significantly to the national economy and regional development.

Established in 1976, RBM has grown to become a key player in the global mineral sands industry. Its operations include open-pit mining, mineral separation, and beneficiation processes, often requiring highly skilled labor and advanced technological expertise.

Socio-Economic Significance

RBM's operations have a profound socio-economic impact in the region, creating employment opportunities, supporting local businesses, and fostering community development initiatives. Recognizing the importance of sustainable development and skills transfer, RBM has historically engaged in various corporate social investment (CSI) projects, including learnerships, internships, and bursary programs.

The Genesis of the Richards Bay Minerals Learnership 2015

Industry Drivers and Skills Gap

By 2015, South Africa faced persistent challenges in unemployment, especially among youth, and a notable skills deficit in the mining and mineral processing sectors.
