Structure and Content of the Vauxhall Astra Parts Catalogue

Organization by Sections

The Astra's parts catalogue is systematically divided into categories corresponding to major vehicle systems and assemblies:

- Engine and Transmission: Details on engine components, gearbox, clutch, and related parts.

- Chassis and Suspension: Includes axles, springs, dampers, and steering components.
- Electrical and Electronic Systems: Wiring harnesses, sensors, ECU modules, lighting.
- Interior and Exterior Fixtures: Seats, dashboards, mirrors, bumpers, and trims.
- Body Panels: Doors, hoods, panels, and panels' mounting hardware.
- Accessories and Optional Equipment: Roof racks, mats, lighting kits.

Within each section, parts are further subdivided into assemblies and individual components, providing a granular level of detail.

Visual Elements and Exploded Views

The core strength of the IPC lies in its visual aids:

- Exploded Diagrams: Show how parts fit together, illustrating assembly sequences and connections.
- Photographs: High-quality images that help verify the appearance and placement.
- Part Number Labels: Each component is labeled with a unique part number, often cross-referenced with technical specifications.

These visuals facilitate understanding of complex assemblies, making repairs accessible even for less experienced users.

Part Numbering System

The catalogue employs a systematic numbering scheme to encode information about each component:

- Prefix Codes: Indicating the system or assembly (e.g., 'A' for engine, 'B' for body).
- Sequential Numbers: Unique identifiers for each part within that system.
- Revision Indicators: Version or revision numbers to track updates or modifications.

This structure aids in quick identification and ensures compatibility across different Astra models and production years.
